

# CONSTELLATION

## ALLIANCE GROUP

For Immediate Release  
November 8, 2022

### **Constellation Alliance Group Developed by Four Leading UAS/AAM Companies**

*Four emerging technology companies form alliance for humanitarian efforts*

**Neeah, WI – November 8, 2022**— Volatus Infrastructure, PromoDrone, Global Aerial

Management Group (GAMG) and Valqari have come together to form the Constellation Alliance Group (CAG). Together this consortium partnership will be focusing on humanitarian efforts in the advanced air mobility (AAM) and unmanned aircraft systems (UAS) sectors.

The CAG has a mutual partnership goal to design, establish and integrate a scalable community based sustainable rapid-response infrastructure including drone and electric vertical take-off and landing (eVTOL) emergency operations for deployment in cities, towns and municipalities across the globe beginning with testing the United States in 2023.

"This alliance represents the collaboration needed to advance the entire industry," said Jamar Williams, Founder and CEO of PromoDrone. "We are here to make things work and get the much-needed systems in place so that our technologies can be put to good use."

"The drone ecosystem can be quickly deployed to address both short term and permanent humanitarian delivery needs," said Ryan Walsh, CEO of Valqari. "This consortium provides a complete framework to address the complex delivery issues during crisis situations."

"Being able to pool our resources and work together for the greater good is humbling," said Grant Fisk, Co-Founder of Volatus Infrastructure. "Humanitarian, emergency and medical uses open up a whole other sector for these emerging technologies. We are going to be able to help people faster than we currently can and serve more of the population."

"I am over the moon with excitement! The combination of power and creative energy coupled with the sheer knowledge level of this team makes this specific collaboration very special," said Toni Drummond, Founder of GAMG. "Pay close attention. We are about to change the future as it's looked upon in plain sight."

PromoDrone is a U.S. drone communications company based in San Diego, California. Founded in 2016, PromoDrone sells two-way digital display drone systems with support to industries where outdoor communication is critical such as public safety, first response, and advertising and marketing.

Valqari enables safe and secure package delivery addressing a number of commercial and consumer markets. Valqari offers both turnkey solutions and licensing opportunities, leveraging its extensive patent portfolio.

Global Aerial Management Group (GAMG) is a solution-oriented company focused on furthering the progress of emerging technologies with a concentration on uncrewed and autonomous flight and mobility. GAMG has a uniquely crafted and specialized approach to provide effective results.

Founded in 2021, Volatus Infrastructure, LLC is connecting communities to the future with best-in-class eVTOL infrastructure technology to ensure society is ready for the future. Volatus offers three main eVTOL infrastructure designs, a vehicle agnostic charging station, plus an app and maintenance programs.
